

Git Submodules Separate Unit of Dev from Unit of Deployment

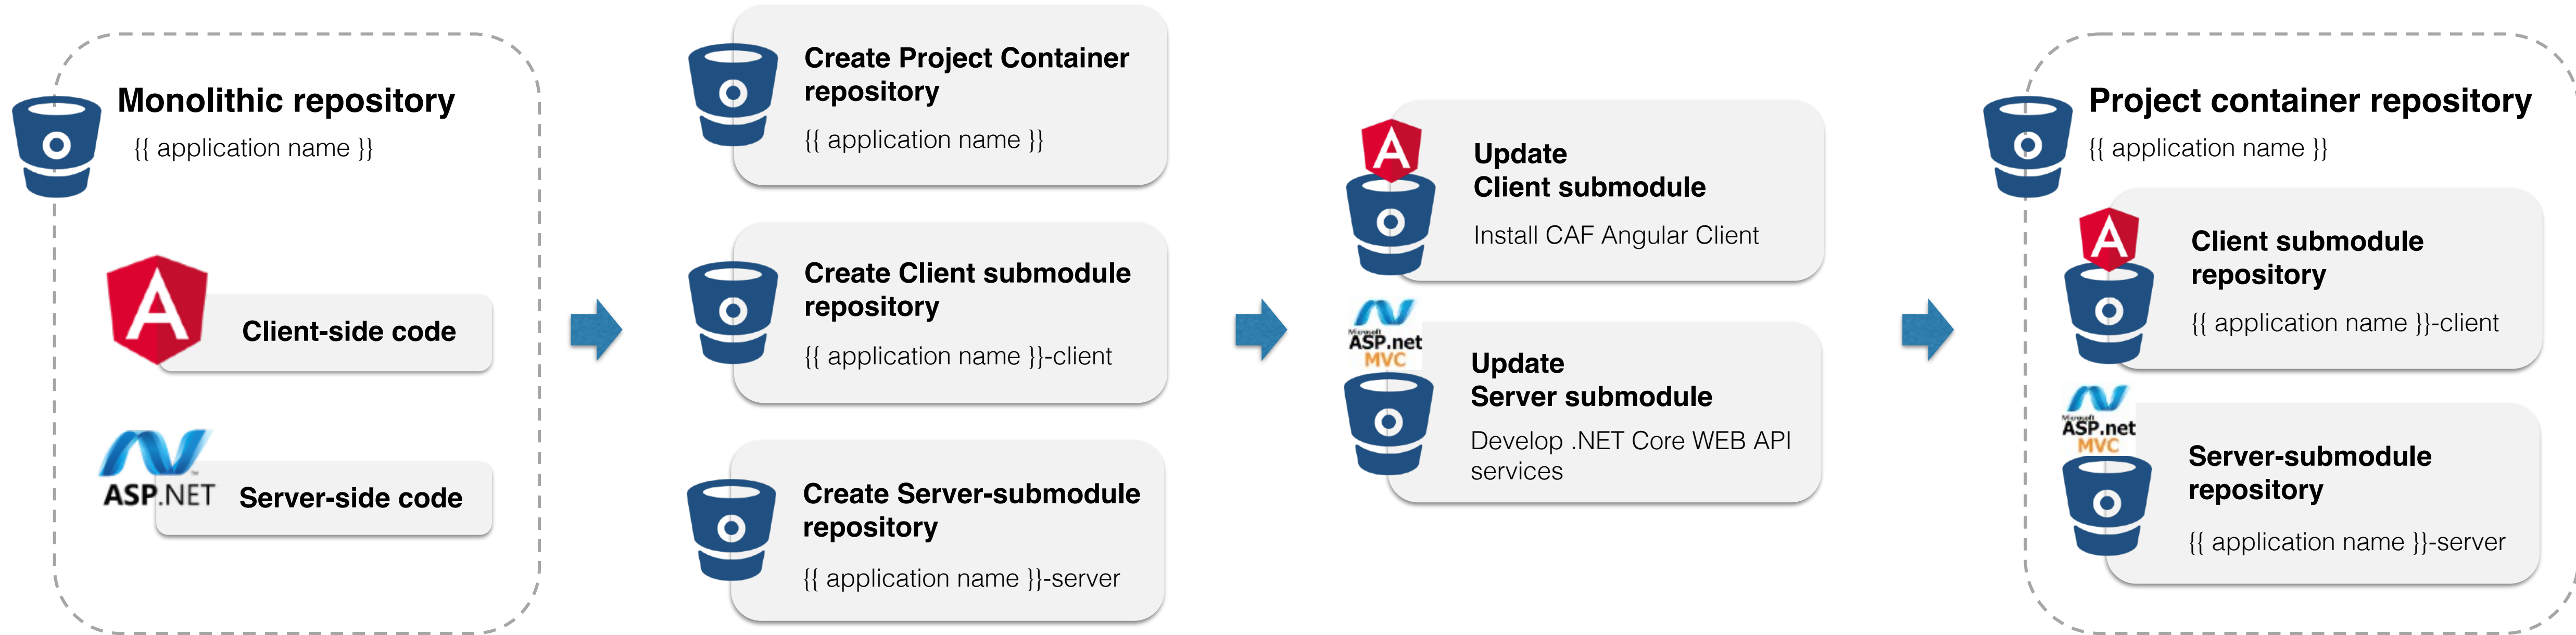

TLDR; So.. How Do I Get Started?

Migrate from Monolithic to Micro Services Architecture

START

- ❑ Angular 1 or ASP.NET WebForms
- ❑ .NET 4.5.1

FINISH

- ✓ CAF/Angular 4
- ✓ CAF/.NET Core 2

Step 3:

Add client & server repository as submodules of project container using 'git submodule' command
